

OCR Child Safety Seat Recycling Program

Each year thousands of child safety seats are sent to the landfill, because there has traditionally been no alternative. In an effort to keep child safety seats out of the landfill, OCR has started a child safety seat recycling program.

OCR is now accepting child safety seats that have expired, seats that have been in car accidents and seats that are no longer being used. All of this is at no cost to the owner. After being disassembled, the car seat materials are then sent to be destroyed and recycled.

OCR would like to encourage parents to be aware of the expiration date on seats and the history of the seats. Child safety seats that have been used in accidents should be destroyed.

Used child safety seats can be dropped off at OCR
Monday – Friday from 7:30am until 5:00pm.
